Johnson & Wales University (JWU) employees and, as may be required by agreement or policy, agents, consultants, representatives, and other affiliated individuals will strive to safeguard the university's financial, legal, and reputational standing and their own credibility and reputations, by promoting objectivity while engaged in research activities.

JWU's Procedures for Identifying and Addressing Financial Conflict of Interest in Research (the "Procedures"), which are based on federal regulations published at <u>42 CFR Part 50</u>, <u>Subpart F</u>, are intended to honor that commitment through the management of financial conflicts of interest (FCOIs) that may arise during research activities supported by federal agencies including, without limitation, the National Science Foundation (NSF) and the U. S. Department of Health & Human Services (HHS), which includes the Public Health Services' Centers for Disease Control and Prevention (CDC), the Food and Drug Administration (FDA), the Health Resources and Services Administration (HRSA), the National Institutes of Health (NIH), and the Substance Abuse and Mental Health Services Administration (SAMHSA).

Many private foundations also require their grantees to abide by the regulations cited above. Unless otherwise directed by law or university policy, individuals employed by or affiliated with JWU who intend on seeking funding from, or who are engaged in research funded by, such foundations will also be required to follow the Procedures.
